

Welcome

Welcome to the official Power BI WTW template theme.

Important considerations

Please change the page general options Canvas settings to custom size, 1920px width by 1080px height.

Please import the WTW-theme.json before adding any new modules, sometimes pre-existing modules don't register the changes correctly, this is a known bug.

Please remove unnecessary data such as empty decimals(1.000) where possible.

Please try to avoid labels touching or overflowing by trialing different data displays, and less decimals.

Please prefer having a small gap between colored bars in the charts for legibility.

Repository for this project for downloading files:

Typography review

Segoe UI paragraph text at 11 points seems too small compared to the minimum button size with radius. As these visuals are for clear presentation purposes, this should be increased to **18 points** for paragraphs.

Titles, we skip header one from the rebrand, as it is not advisable to use Times New Roman here.

Chart titles and legends are in bold at 24 points.

X and Y axis titles are bold at 24 points.

Buttons are bold at 18 points.

X and Y axis values along the edges of charts are regular 18 points.

Data labels inside the charts are regular at 14 points.

Sample button

Typography Segoe UI

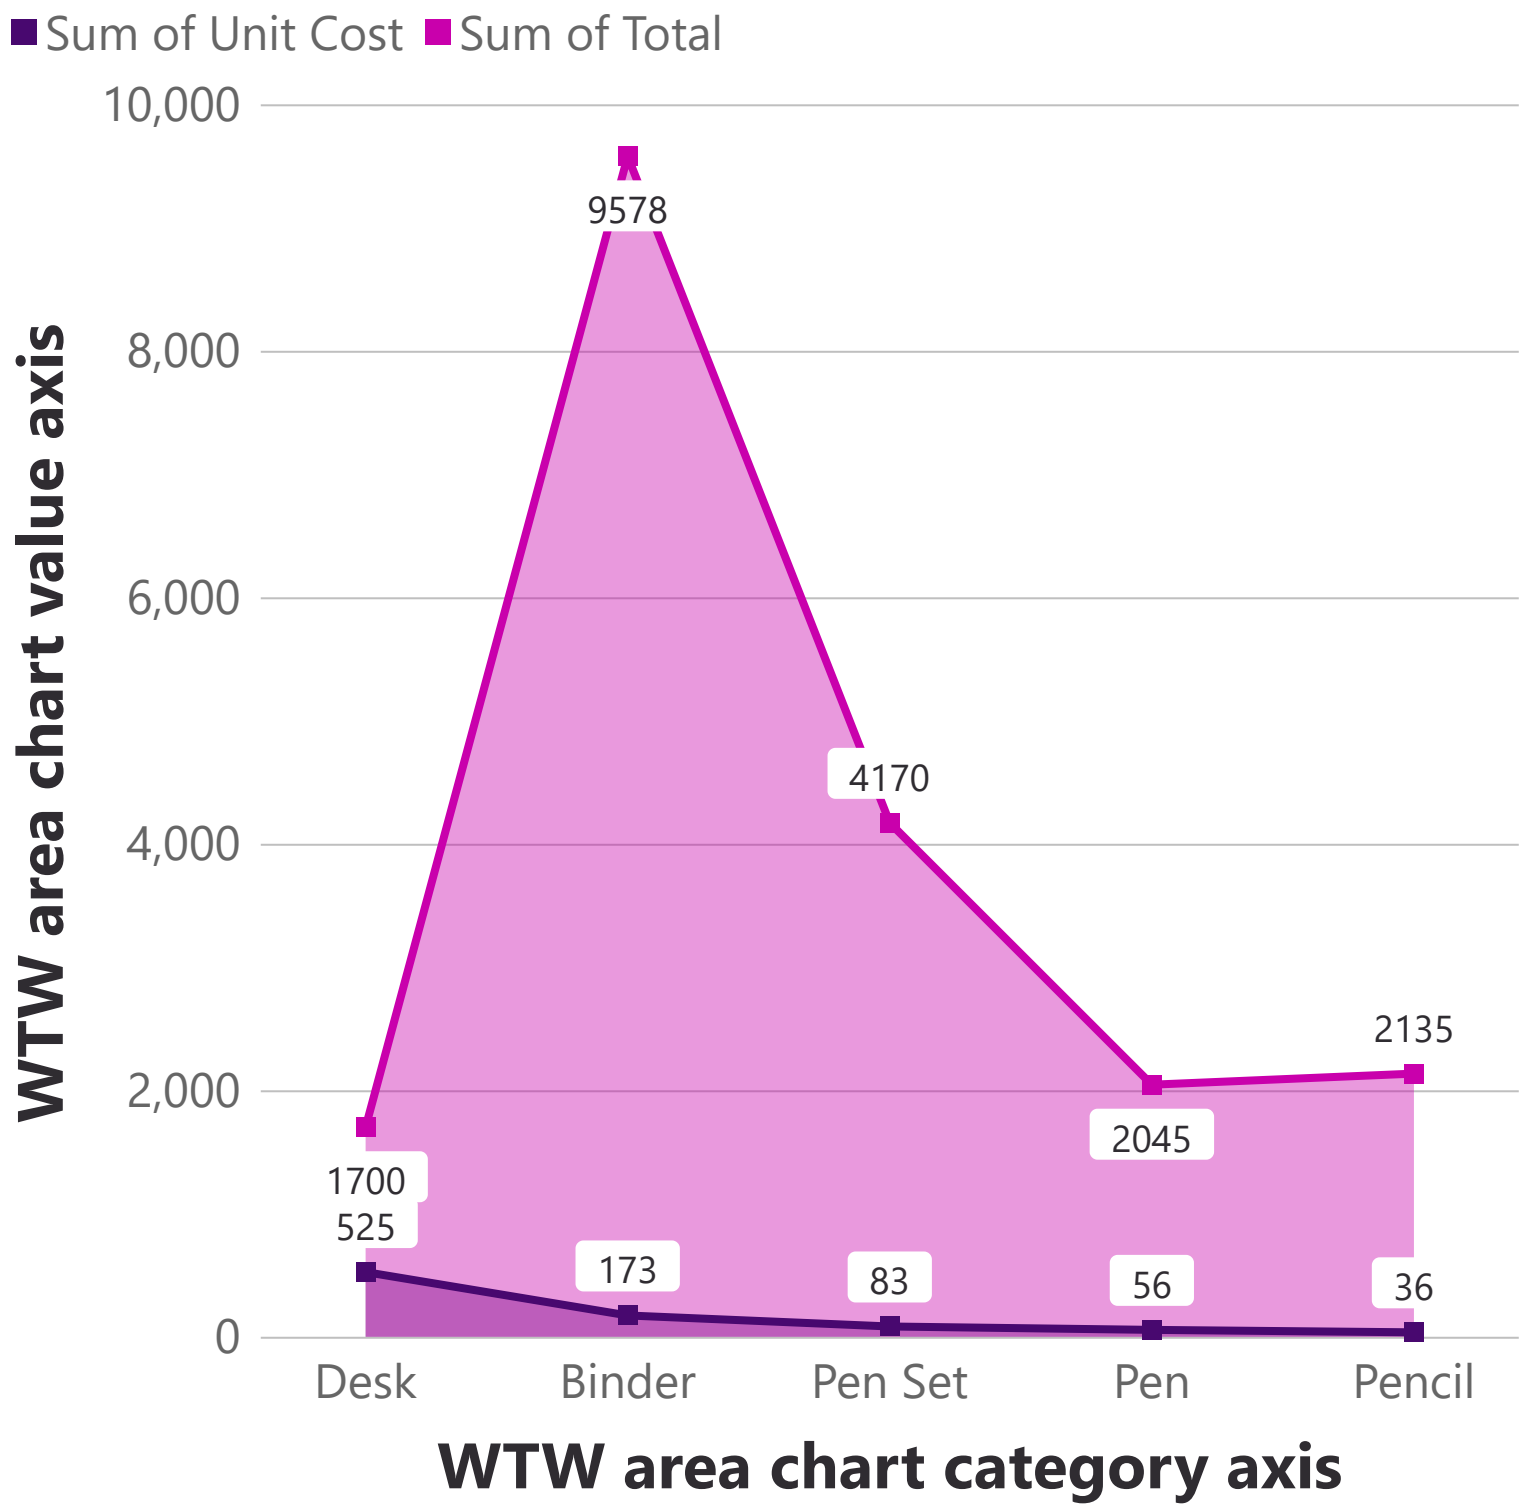

Header one 42 pts

Header two 40 pts

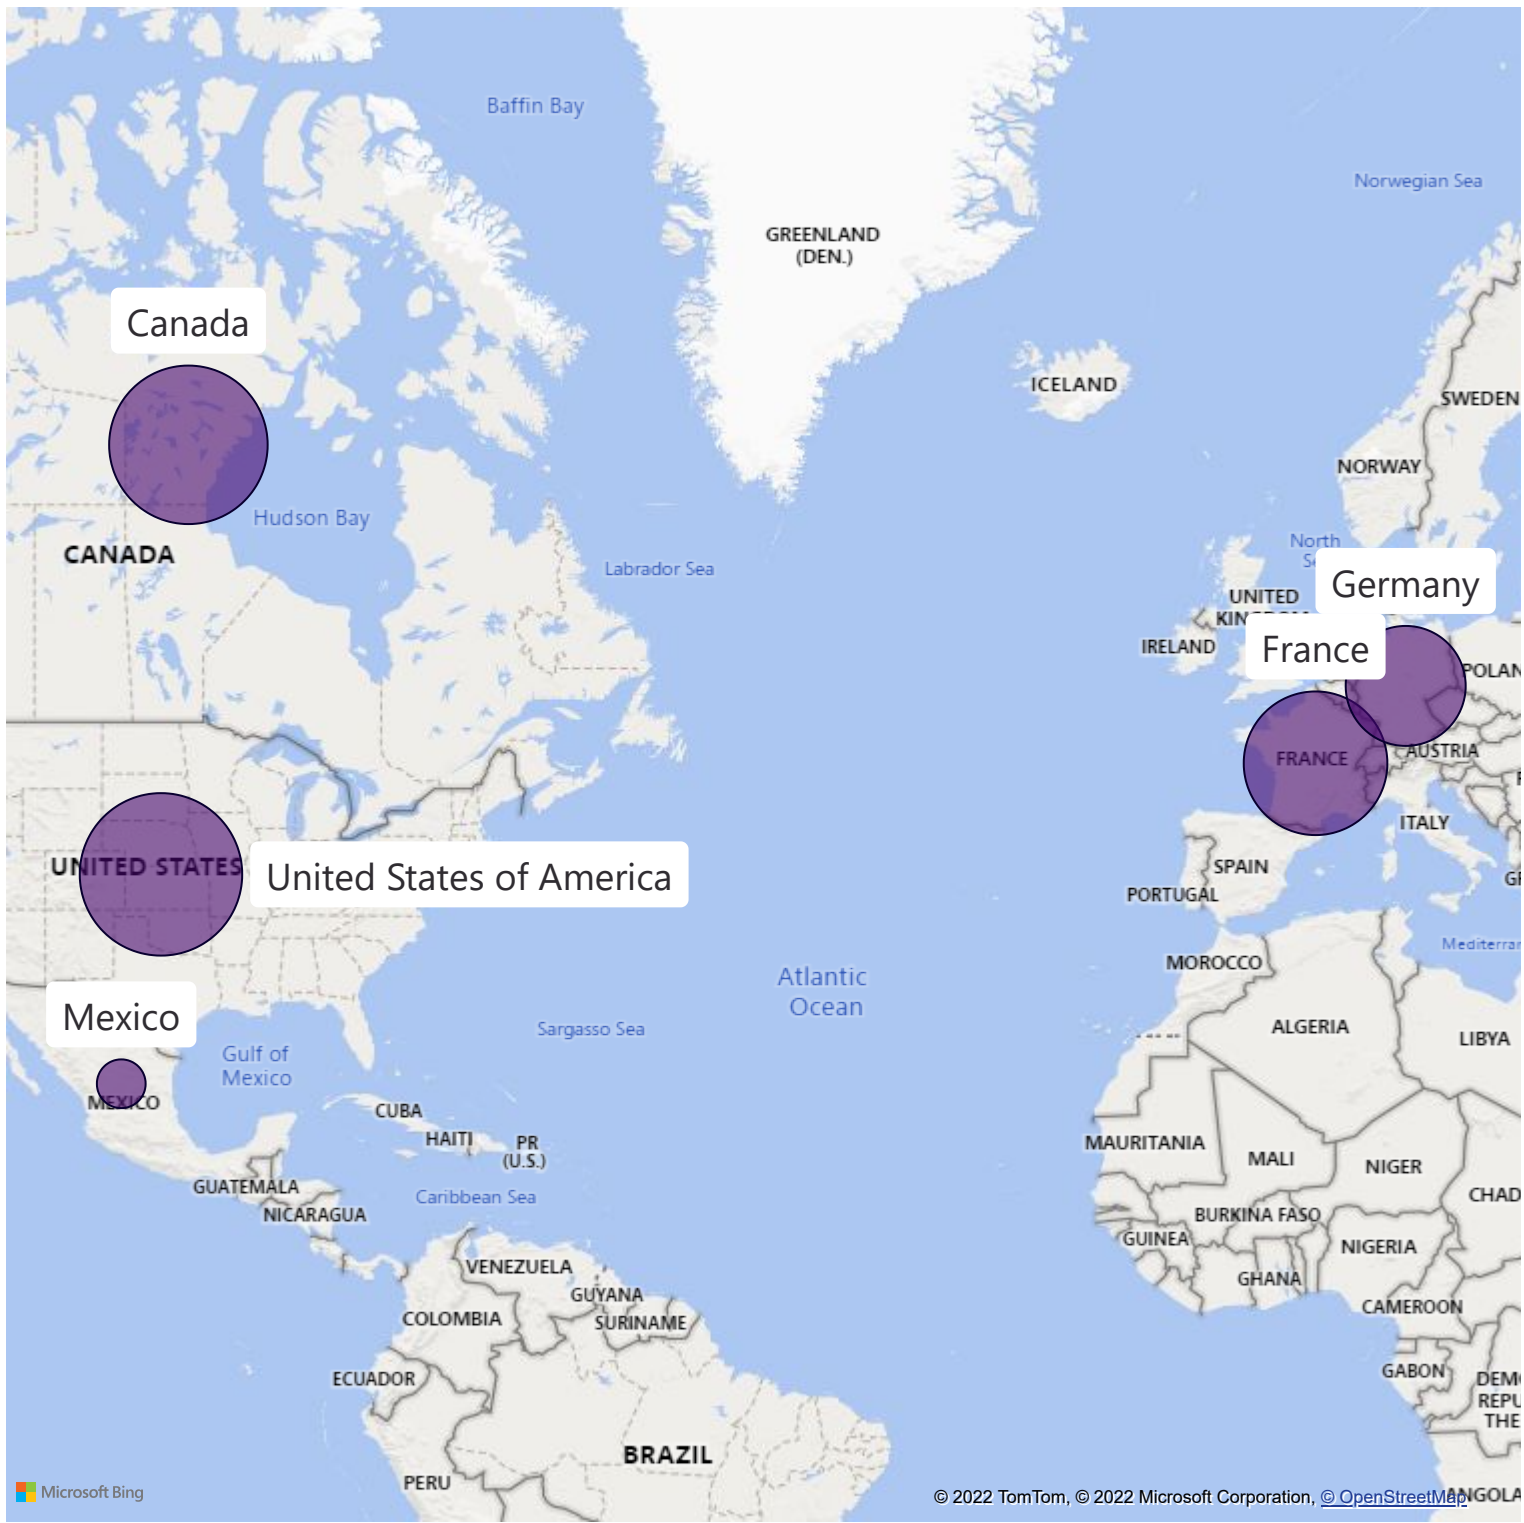

Header three 32 pts

Header four 24 pts

Area Chart

Azure Map

Card

We cannot replicate the branding of WTW cards here, the drop shadow without padding does not look right.

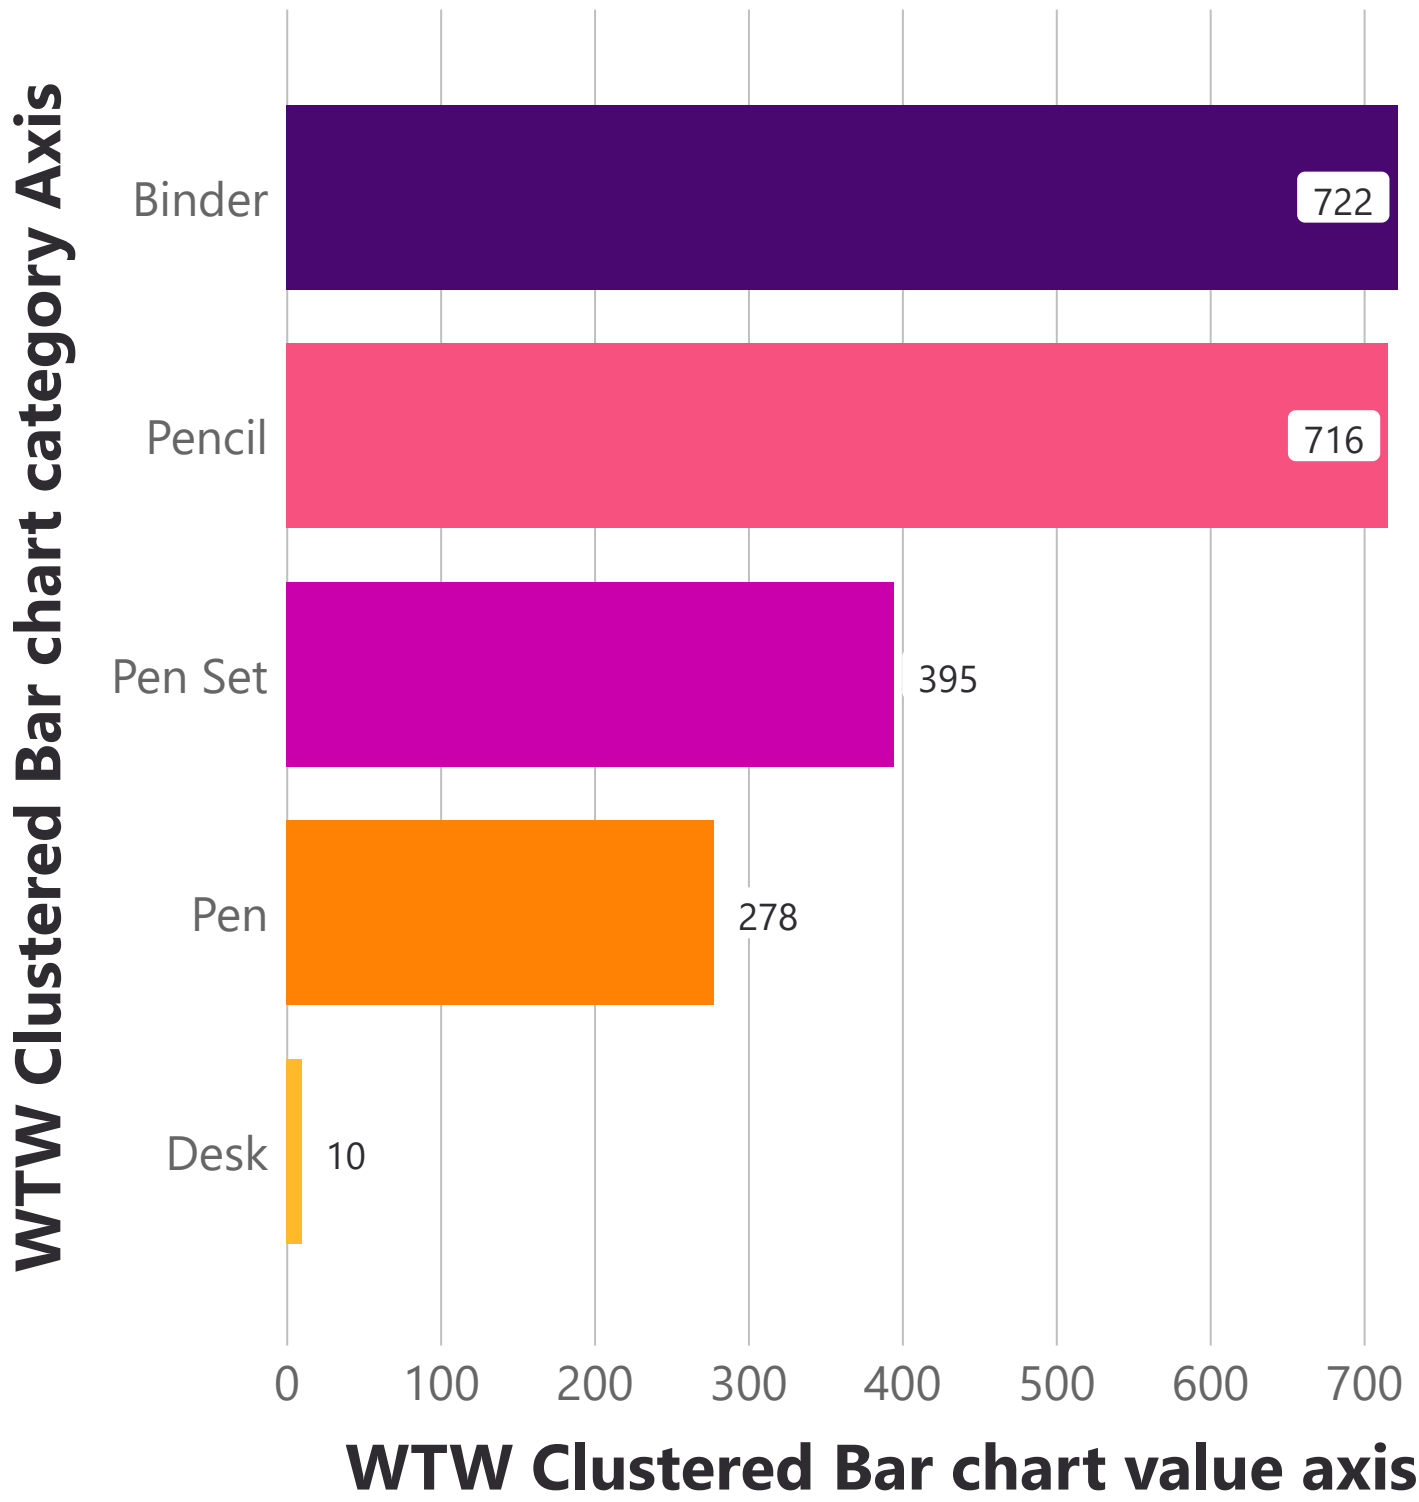

Exceptionally, in cards and text boxes we use 16px not 18px.

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Duis id ornare tellus. Phasellus blandit varius mi ac consequat. Integer vulputate orci at libero feugiat faucibus a ut mi. Praesent nec tellus at dui vehicula congue ipsum.

KPI

485.65K✓
Goal: 200.00

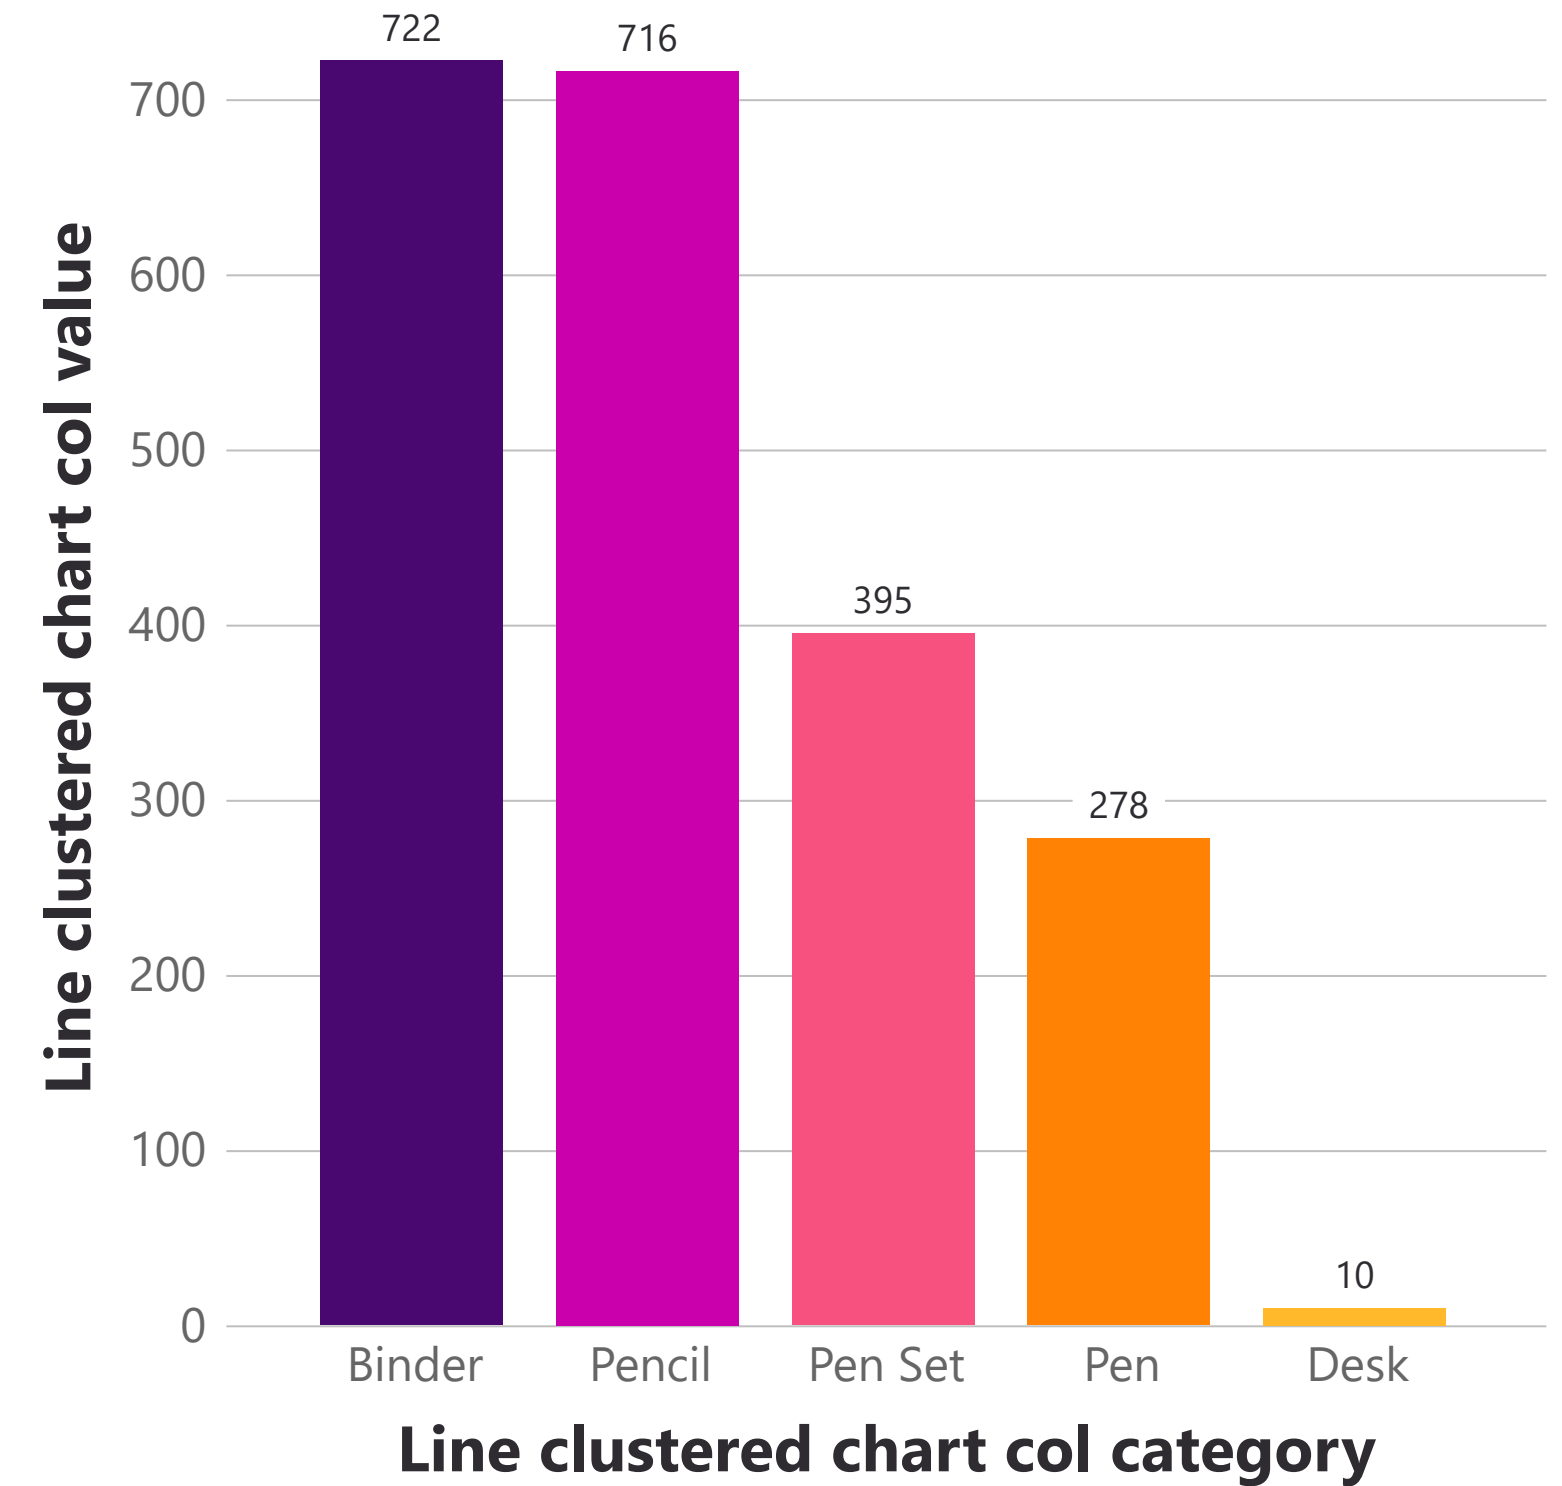

KPI uses good (#007D61), neutral(#FFB92A) and bad(#B1232D), but these can be changed via the format options. No typographic control.
